Mission & Vision

Bricolage envisions theater not as a passive experience, but as a vehicle for heightened involvement for artist and audience alike. Our approach encourages artists to take the creative risks necessary to create full-blooded, high-quality theatrical experiences that challenge audiences to engage in new ways, react, and express openly their opinions about our work – to have a stake in the creative discussion.

The word Bricolage means “making artful use of what is at hand.” What excites us is the connection and interaction between seemingly disparate elements, and the potential for these components to resonate as one cohesive event. We use the distinctive resources of the Pittsburgh region to create theatrical experiences that stimulate a heightened sense of involvement for the audience. “What is at hand” is the city’s changing landscape, its plentiful human and material resources, and the salient political, cultural, and ethical issues we all encounter and react to each day. By combining different artistic mediums, nourishing local talent, producing provocative work, and facilitating audience engagement, Bricolage seeks to revitalize live performance for a new era.
